Dear Frannie,

Your presentation deeply impacted all attendees and kept us fully engaged from start to finish. Your courageous, intriguing and powerful story needs to be heard. We also enjoyed your tasteful injection of humor which added welcome levity. Your story was of much interest; how you handled relationships growing up in Canada in the 60's and 70's, raised Catholic, and that your family's name was really Sigal from Vienna was very telling of the atmosphere of anti-Semitism during that time.

Wishing you enormous luck with your book and film. Thank you very much, again, for presenting your story to our audience in Sarasota. May your important work continue to inspire others to come forth with their own stories of conquering ghosts in their family history.
